add images/partha.jpg

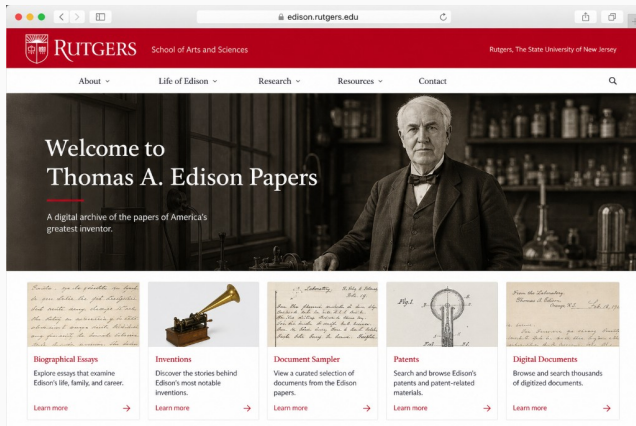

Partha Pediredla

Rising Senior, Rutgers University

- Electrical & Computer Engineering + Mathematics
- Interests: ML, AI / prompt engineering, Python, APIs
- Role: building the automation pipeline for the Edison Papers

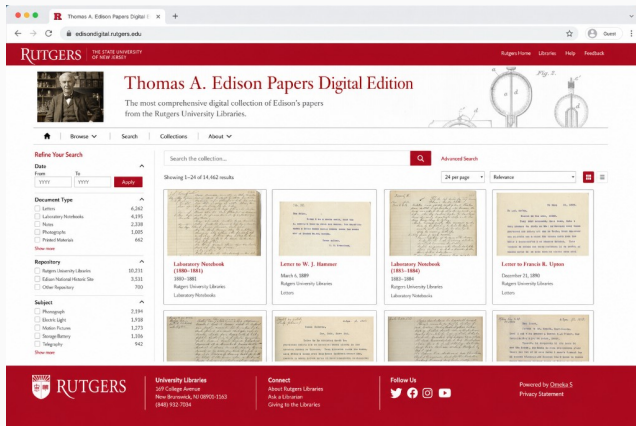

The Thomas A. Edison Papers – Project Site

- Rutgers' Edison Papers Project
- Biography, inventions, research
- Hosted at `edison.rutgers.edu`

The Thomas A. Edison Papers Digital Edition

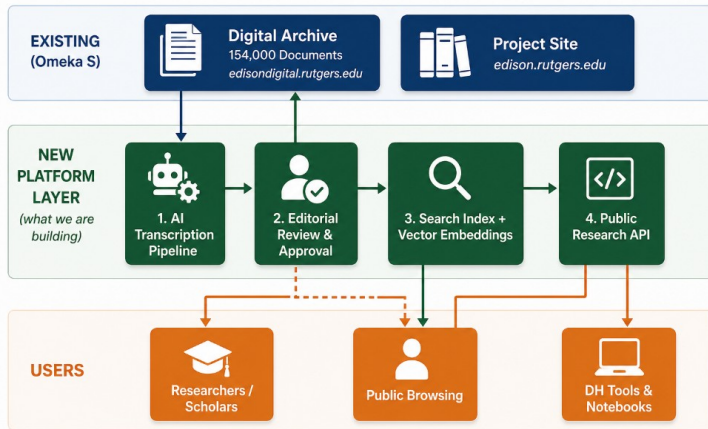

- ~154,000 digitized documents
- Hosted on Omeka S at `edisondigital.rutgers.edu`
- Works today as a digital archive:
browse, filter, view scanned pages

Overall goal

- Static archive → dynamic research platform
- AI transcription of all documents
- AI indexing for new documents
- Semantic search across the corpus
- APIs for digital humanities scholarship

Edison Papers Research Platform – Architecture Overview

One-week goal: fundamental automation pipeline

From Page Image to Searchable Research Platform

Raw scans → transcribed → indexed → ready for human editing & verification.
